August 31, 2017

Dear Valued Customer,

I am sure that you have seen the coverage of Hurricane Harvey and the devastation this unprecedented storm is creating in Texas and Louisiana. As always, our first concern is for our fellow human beings that are being effected by this tragedy. Our secondary concern is the effect that this hurricane will have on our suppliers, our operation, and our supply to our customers.

We anticipate that the polypropylene and polyethylene resin supply will be extremely limited in the coming weeks due to the closure of many resin supply facilities. With the storm and still rising flood waters effecting the operations in the area, it is impossible to accurately assess how disruptive this event is going to be.

Wrap Tite is closely monitoring the situation and is in constant contact with suppliers, you will be notified by a representative of any impact to any orders that are placed during this time. Limiting the disruption of this event to our customers is our highest priority. We appreciate your understanding and patience during this challenging time. If you have any questions, feel free to contact your representative.

Sincerely,

Sunil Daga

President
